Information about the practical test

I am aware that, according to DEKRA's general terms and conditions, I can cancel the arranged driving test free of charge up to 4 business days before it is due to take place. A shorter period of notice is only acceptable in case of illness and requires presentation of a doctor's note to DEKRA.

On the day of your practical test, please bring with you:

- *your ID or passport
- *proof of transfer/payment of the examination fee for DEKRA class.A, A2: € 112.81 - class B, A1, AM: € 84,97
- *as well as unpaid driving school fees (to be paid in cash):
- *Any required visual aids (see Eye test) must be used during the examination; otherwise the test will be cancelled at the examinee's expense. In the case of contact lenses, an eyesight record card is to be presented! The driving instructor will not conduct the test if any bills remain unpaid. Should this situation arise, the learner driver will be liable for any costs incurred as well as the DEKRA examination fees.

We want you to pass this test!

Please arrange with your driving instructor when and where you will be meeting on the day of the test

- *Some tips drawn from our experience, acquired over thousands of driving tests.
- *don't let everybody know about the test beforehand - you'll feel under less pressure to succeed
- *don't believe everything people tell you about their own driving tests
- *don't rush into your test because of a shortage of money; it costs money to repeat a driving test too!
- *relax before the exam, stay calm and ask the driving test supervisor if anything is unclear
- *there is no such thing as error-free driving; minor errors are normal
- *don't think too much about any errors you make; it distracts you from your driving and makes further - errors more likely
- *if you make an error, take a deep breath, run through it in your head - and try again
- *no rush, no panic, no impulsive actions, no dawdling

Core elements: (know dashboard lights and + switches - 1.6 mm tread depth)

Look first (rear-view + wing mirrors), indicate, then stop - check in the mirrors and look over your shoulder, 😊

Don't get closer than 50 cm to other vehicles - better start correcting now

Focus residential areas: Clear STOP at the line or line of visibility in case of stop sign and at the line in front of a red light with a green arrow (clear STOP to get an overview)

Check in rear-view mirror before indicating and look over shoulder 😊 before avoiding, turning off or changing lanes!!

Walking speed in reduced-traffic areas = 1st gear – about 1,000 rpm

In case of obstacles on the carriageway = give way to oncoming traffic

side clearance to cyclists about 1.5 m – in case of solid lines and oncoming traffic: Do not overtake yet!

Don't enter closed-off roads!

When turning left on a one-way street, use the left-hand lane!

In restricted speed zones, roads tend to have equal priority – pay attention!

Focus motorways/country roads: Join rapidly; if the gap is too small, stop at the end of the acceleration line, otherwise keep sufficient distance (about 50-100 m = 3 sec. – also to the rear!) when joining, avoiding and getting into lane for

overtaking. On motorways, try to overtake rapidly and try to drive faster than

100 km/h if permitted! Start indicating at the 1st countdown marker when leaving the motorway. Pay attention to city/locality limit signs (50 km/h) further on.

Don't overtake on the right, either on motorways or outside of towns, avoid driving on the left without reason, or, in the case of two one-way lanes, avoid driving on the left without reason! Drive as far to the right as possible!

Use the days before the test for intensive training!
